VIRGIN GUM OR DRAINER DRIP?

To Turpentine Operators:

Fresh gum yields the best rosin and most turpentine.
Don't lose money by letting that old gum left in dip
barrels or hauled back into the woods lower the grade
and quantity of your products.

Clean your dip barrels thoroughly as soon as empty.
Drain and scrape barrels and wash out all gum with a
bucket or two of hot water.

STOP LEAKS AND WASTES

Keep dip barrels covered—always.
Be sure that lids fit tight.
Watch for leaks. Keep barrels tight and under cover.
It's the gum that gets to the still that counts.
